5. PHOTOS <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	6. SOURCE Military	
7. LENGTH OF OBSERVATION not given	8. NUMBER OF OBJECTS one	9. COURSE not given
10. BRIEF SUMMARY OF SIGHTING CIRVIS report. Described as possible rocket reentry. Greenish color with white sputtering tail. Visible from 45° elevation through 20° elevation. Direction not reported. Duration not given.		11. COMMENTS Although duration was not given, it was reported as a possible reentry, and thus would be short. It failed to include breaking up and the reddish color associated with reentries; therefore, it is more probable that the sighting was a fireball. Color and flight indicate this. There is enough information to classify this as a meteor sighting.
